DREAM ENVIRONMENT

Sanctum Design Group is an Atlanta-based landscape firm that specializes in the design and installation of high-end, highly detailed, exterior landscape environments and garden rooms. To enhance his clients' enjoyment of entertaining, recreating, gardening and just relaxing in their dream environment, Tom Flowers, President, spends a great deal of time helping them clarify their dreams. Flowers has over 25 years of experience in landscape design and creating innovative outdoor spaces. "I help clients to envision how the space will be used, what their family needs and what their budget will support," says Flowers. "During the initial meeting, I seek to understand their individual lifestyle, because it ultimately doesn't matter if I'm the greatest designer — it only matters that I give the client the design he or she wants," Flowers insists.

The Sanctum Design team is renowned for their distinct ability to look outside the box. "There is always a design solution," assures Flowers. He believes, as human beings, we are made for the outdoors. "We are drawn to it," Flowers explains. Nothing seems to give this atypical landscaper greater satisfaction than creating the perfect mix of 'hardscapes' and 'softscapes' to bring clients' outdoor environments to their full potential. "Whatever else it may lack, all property is blessed with potential," Flowers believes. "At Sanctum, we discover that potential."

Tom Flowers teaches at the Atlanta Botanical Garden and is a popular speaker at garden clubs and landscape professional meetings across metro Atlanta. One of Sanctum's landscapes was voted "Atlanta's Coolest Backyard" by the readers of Atlanta Home Improvement Magazine.
